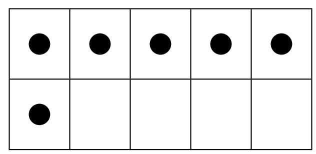
Ten-Frames: See Numbers to Ten

Five and more, almost ten, and building the frame

Directions: A ten-frame has two rows of five boxes.

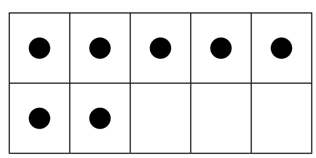
- A full top row is **5** — you never need to recount it.
- A full frame is **10**. Each empty box means one less than ten.

1. The top row is full. How many dots in the bottom row? How many in all?



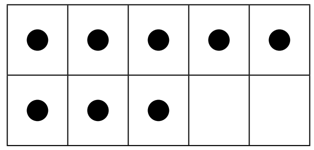
Bottom row: _________ In all: _________

2. The top row is full again. How many dots in the bottom row? How many in all?



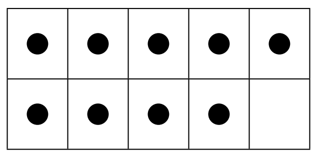
Bottom row: _________ In all: _________

3. Full top row, dots below. How many in the bottom row? How many in all?



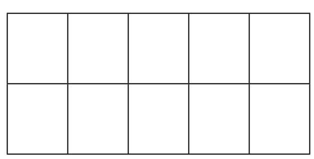
Bottom row: _________ In all: _________

4. This frame is *almost* full. How many boxes are empty? How many dots in all?



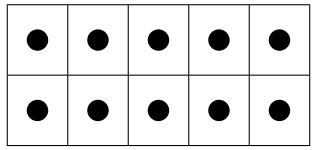
Empty boxes: _________ Dots in all: _________

5. Build the number **8** on this empty frame: draw the dots. Fill the top row first. Then write how many dots go in each row.



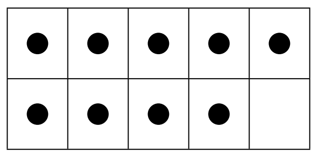
Top row: _________ Bottom row: _________

6. Look — every box has a dot! How many dots in all? How many boxes are empty?



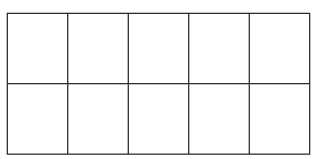
Dots in all: _________ Empty boxes: _________

7. Full top row, dots below. How many in the bottom row? How many in all?



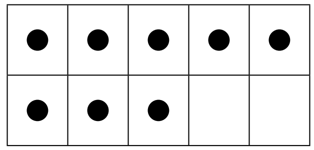
Bottom row: _________ In all: _________

8. Build the number **6** on this empty frame: draw the dots, top row first. Then write how many dots go in each row.



Top row: _________ Bottom row: _________

9. How many boxes are empty? How many dots in all?



Empty boxes: __________ Dots in all: __________

10. **Challenge.** The top row is full and there are 4 dots below. How many dots in all?

____

Then tell how the frame helps you see the number *fast*, without counting every dot — tell a grown-up or write it below.
