Find the Missing Number
Answer Key
Grade 1

Quick Answers

1. 2
2. 5
3. 6
4. 5
5. 7
6. 6
7. (a) the missing number = 6, (b) the subtraction check = 6
8. 8

Curriculum

Level: Grade 1
1.OA.A.1 – *problems 3, 4, 8*
1.OA.C.6 – *problems 1, 2, 5, 6, 7*
Difficulty 1–4 of 5 across 9 tagged checks.

1. The ten frame shows 8 counters. How many more fill the frame? $8 + \_\_ = 10$
Solution: The frame has 10 spaces and 8 are filled, so count on from 8: 9, 10 — that is 2 more counters. $\boxed{2}$

---

2. Part–whole box: whole 12, one part 7. $7 + \_\_ = 12$
Solution: The whole is 12 and one part is 7. Count on from 7 up to 12: 8, 9, 10, 11, 12 — that is 5 jumps, so the missing part is 5. $\boxed{5}$

---

3. Jo has 9 grapes and wants 15. How many more grapes? $9 + \_\_ = 15$
Solution: Count on from 9 to 15: 10, 11, 12, 13, 14, 15 — six jumps. Jo needs 6 more grapes. $\boxed{6}$

---

4. 6 kids on the bus, more get on, now 11. How many got on? $6 + \_\_ = 11$
Solution: Count on from 6 to 11: 7, 8, 9, 10, 11 — five jumps, so 5 kids got on at the stop. $\boxed{5}$

---

5. Part–whole box: whole 16, one part 9. $9 + \_\_ = 16$

Solution: Whole 16, part 9. Make ten first: 9 and 1 is 10, then 6 more reaches 16. That is $1 + 6 = 7$, so the missing part is 7. $\boxed{7}$

---

6. The first part is missing: $\_\_ + 8 = 14$
Solution: The missing number and 8 make 14 together, so subtract: $14 - 8 = 6$. Check: $6 + 8 = 14$. $\boxed{6}$

---

7. (a) $7 + \_\_ = 13$ (b) the subtraction that checks it: $13 - 7 = \_\_$
Solution: (a) Count on from 7 to 13: six jumps, so the missing number is $\boxed{6}$
(b) The same fact family, written as subtraction: $13 - 7$ takes the known part away from the whole and leaves $\boxed{6}$

---

8. Lia had some shells, found 6 more, now has 14. How many did she start with? $\_\_ + 6 = 14$
Solution: Work backwards from the whole: take away the 6 she found, $14 - 6 = 8$. Check by counting on: $8 + 6 = 14$. She started with 8 shells. $\boxed{8}$
