

How Many? Counting Practice

Counting rows, arrays, and ten-frames

Directions:

- Touch each dot one time as you count. Say one number for each dot.
- The last number you say tells *how many*.
- Write the number on the blank.

1. Count the dots. How many? _____

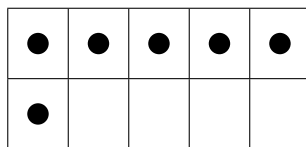

2. Count the dots. How many? _____

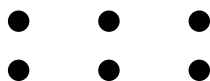

3. Count the dots. How many? _____

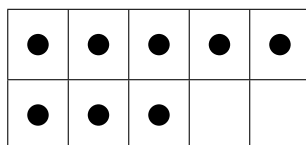

4. The top row of this ten-frame is full. Count all the dots. How many? _____

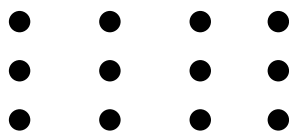

5. Count the dots in this array. Count one row, then the next row. How many? _____

6. Count all the dots on the ten-frame. How many? _____

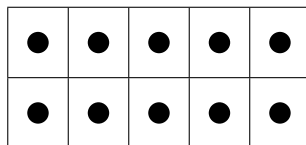

7. Count the dots in this array. How many? _____

8. This is a long row! Touch each dot as you count. How many? _____

9. This ten-frame is completely full. Count all the dots. How many? _____

10. Challenge. Count all the dots in this big array. How many? _____

Then tell how you counted — you can say it to a grown-up or write it on the lines below.
