

Strategy Pickers: Addition Facts

Counting on, doubles and near doubles, and partners that make ten

Directions: Before you add, pick the strategy that fits the numbers best!

- **Count on** when one number is small: say the big number, hop the little one.
- **Doubles** when the numbers match — and **near doubles** when they almost match.
- **Tens partners** when the two numbers fit together to make 10.

1. Warm-up. Just one more! Count on.

$$8 + 1 = \underline{\hspace{2cm}}$$

2. Warm-up. Count on from 6.

$$6 + 2 = \underline{\hspace{2cm}}$$

3. Warm-up. Start with the bigger number, then count on.

$$2 + 7 = \underline{\hspace{2cm}}$$

4. Pick your strategy, then add.

$$4 + 4 = \underline{\hspace{2cm}}$$

5. Pick your strategy, then add.

$$3 + 7 = \underline{\hspace{2cm}}$$

6. Pick your strategy, then add.

$$5 + 5 = \underline{\hspace{2cm}}$$

7. Pick your strategy, then add.

$$6 + 4 = \underline{\hspace{2cm}}$$

8. Pick your strategy, then add. Hint: it is almost a double!

$$3 + 4 = \underline{\hspace{2cm}}$$

9. Pick your strategy, then add.

$$5 + 3 = \underline{\hspace{2cm}}$$

10. Challenge! Add $4 + 5$ with the strategy you like best. Then tell which strategy you picked and why it is quick for these numbers.

$$4 + 5 = \underline{\hspace{2cm}}$$
