

Multiplication Three Ways

moving among repeated addition, arrays, and products

Directions

- The same multiplication idea can be written three ways: as **repeated addition**, as an **array**, and as a **product** (a multiplication fact).
- In each problem, move from the form you are given to the form the problem asks for, then find the total.

1. Fill in the blanks: $4 + 4 + 4 = \underline{\hspace{2cm}} \times 4 = \underline{\hspace{2cm}}$

2. Fill in the blanks: $6 + 6 + 6 + 6 + 6 = \underline{\hspace{2cm}} \times 6 = \underline{\hspace{2cm}}$

3. Mia reads 8 pages of her book each day for 3 days. Write a multiplication fact for her reading, then find the total.

Multiplication fact:

Answer: _____

Total pages: _____

4. Look at this array.

It has 3 rows with 6 dots in each row. Write a multiplication fact for the array, then count the dots.

Multiplication fact:

Answer: _____

Total dots: _____

5. Write 4×7 as repeated addition, then find the total.

Repeated addition:

Answer: _____

Total: _____

6. Ari builds an array with 5 rows and 4 dots in each row. Write a repeated addition that the array shows, then find how many dots Ari used.

Repeated addition:

Answer: _____

Total dots: _____

7. Fill in the blanks: $9 + 9 =$ _____ $\times 9 =$ _____

8. Write 6×5 as repeated addition, then find the total.

Repeated addition:

Answer: _____

Total: _____

9. Look at this star array.

```

★ ★ ★ ★ ★
★ ★ ★ ★ ★
★ ★ ★ ★ ★
★ ★ ★ ★ ★
★ ★ ★ ★ ★
★ ★ ★ ★ ★
★ ★ ★ ★ ★
    
```

It has 7 rows with 5 stars in each row. Write a multiplication fact for the array, then count the stars.

Multiplication fact:

Answer: _____

Total stars: _____

10. Fill in the blanks: $10 + 10 + 10 + 10 = \underline{\hspace{2cm}} \times 10 = \underline{\hspace{2cm}}$

11. How many 8s do you need to add to reach 40? Solve: $8 \times n = 40$, $n = \underline{\hspace{2cm}}$

12. Challenge. The gym has 6 rows of chairs with 9 chairs in each row.

(a) Write a multiplication fact for the chair array.

Answer: _____

(b) Write the matching repeated addition.

Answer: _____

(c) How many chairs are in the gym in all?

Total chairs: _____
