

# Reading and Comparing Multi-Digit Numbers

---

*Value of a digit, number forms, and comparing numbers*

**Directions:** Use the place-value charts and models to help you. Show your thinking in the space under each problem, and write each final answer on its answer blank.

1. The place-value chart shows the number 5,872.

| Thousands | Hundreds | Tens | Ones |
|-----------|----------|------|------|
| 5         | 8        | 7    | 2    |

Using the chart, what is the *value* of the digit 8?

Answer: \_\_\_\_\_

2. What is the value of the digit 6 in 46,205? (It may help to write the number in a place-value chart first.)

Answer: \_\_\_\_\_

3. Write the number in standard form:

$$30,000 + 7,000 + 400 + 9 = \underline{\hspace{2cm}}$$

4. Write this number in standard form: *sixty-two thousand, four hundred eighteen*.

Answer: \_\_\_\_\_

5. Write  $<$ ,  $>$ , or  $=$  to make the statement true:

46,205 \_\_\_\_\_ 46,502

6. Write  $<$ ,  $>$ , or  $=$  to make the statement true:

72,341 \_\_\_\_\_ 72,314

7. Order these numbers from least to greatest: 23,450; 23,045; 23,504

least \_\_\_\_\_ middle \_\_\_\_\_ greatest \_\_\_\_\_

8. The digit 4 appears twice in 44,175.

| Ten-thousands | Thousands | Hundreds | Tens | Ones |
|---------------|-----------|----------|------|------|
| 4             | 4         | 1        | 7    | 5    |

The 4 in the ten-thousands place is how many *times* the value of the 4 in the thousands place?

Answer: \_\_\_\_\_

**9.** Maya says  $9,876 > 12,345$  “because 9 is greater than 1.” Write the correct comparison symbol:  $9,876$  \_\_\_\_\_  $12,345$ . Then explain in one sentence what Maya forgot to check first.

**10.** A stadium counted 68,742 fans on Saturday and 68,472 fans on Sunday.

- (a) Which day had the greater attendance? \_\_\_\_\_
- (b) How many more fans attended that day? \_\_\_\_\_
