

Mixed Numbers in Real Life

Adding, subtracting, and regrouping mixed numbers in real contexts

Directions:

- Every problem is a real situation. All the numbers you need are given in the problem; write your answer with its unit.
- Give every answer as a mixed number in simplest form.

1. On Saturday, Priya hikes the Fern Trail, which is $1\frac{1}{4}$ mi long, and then the Creek Trail, which is $2\frac{1}{4}$ mi long. How many miles does she hike in all?

Answer: _____ mi

2. A board is $4\frac{3}{8}$ ft long. A carpenter saws off a piece $2\frac{1}{8}$ ft long. How many feet of board are left?

Answer: _____ ft

3. A muffin recipe uses $2\frac{2}{3}$ cups of flour and a bread recipe uses $1\frac{2}{3}$ cups. How many cups of flour do the two recipes need altogether?

Answer: _____ cups

4. A pitcher holds $3\frac{5}{6}$ L of lemonade. Guests drink $1\frac{1}{6}$ L. How many liters of lemonade are left?

Answer: _____ L

5. Two watermelons are weighed at a market stand. The small one weighs $1\frac{3}{5}$ kg and the large one weighs $2\frac{4}{5}$ kg. What is their total weight, in kilograms?

Answer: _____ kg

6. A spool holds $5\frac{1}{4}$ m of rope. Deshi uses $2\frac{3}{4}$ m to hang a swing. How many meters of rope are left on the spool? *Hint: you will need to regroup.*

Answer: _____ m

7. At the fair, Jo's pumpkin weighs $6\frac{1}{8}$ kg and Ben's pumpkin weighs $3\frac{5}{8}$ kg. How many kilograms heavier is Jo's pumpkin?

Answer: _____ kg

8. Mira does homework for $1\frac{1}{2}$ hours and then practices violin for $2\frac{1}{4}$ hours. How many hours is that in all?

Answer: _____ hours

9. Zoe needs $4\frac{1}{3}$ m of fabric for a costume. She already has $1\frac{2}{3}$ m. How many more meters of fabric does she need to buy?

Answer: _____ m

10. Challenge. A punch bowl holds 6 cups. Miguel pours in $2\frac{3}{4}$ cups of orange juice and $1\frac{3}{4}$ cups of pineapple juice. How many more cups of juice would fill the bowl to the top?

Answer: _____ cups
