

# Signed Rational Numbers: Mixed Operations Review

---

*adding, subtracting, multiplying, and dividing signed rational numbers, with mixed operations*

**Directions:**

- After the warm-up, the operations are mixed — decide which sign rule applies before you compute.
- Show your work; write each answer in simplest form.

1. Evaluate:  $-9 + 4$

Answer: \_\_\_\_\_

2. Evaluate:  $4 - 11$

Answer: \_\_\_\_\_

3. Evaluate:  $(-4)(-7)$

Answer: \_\_\_\_\_

4. Evaluate:  $-\frac{2}{5} + (-\frac{1}{5})$

Answer: \_\_\_\_\_

5. Evaluate:  $-7 - (-9)$

Answer: \_\_\_\_\_

6. Evaluate, writing the answer as a fraction in simplest form:  $-36 \div 8$

Answer: \_\_\_\_\_

7. Evaluate:  $-\frac{5}{6} + \frac{1}{4}$

Answer: \_\_\_\_\_

8. Evaluate:  $1.5 - (-2.25)$

Answer: \_\_\_\_\_

9. Evaluate:  $(-\frac{2}{3})(\frac{9}{8})$

Answer: \_\_\_\_\_

**10.** Write  $<$  or  $>$  in the blank to make a true statement:

$$-\frac{7}{8} \quad \underline{\hspace{1cm}} \quad -0.9$$

**11.** Evaluate:  $-2\left(\frac{3}{4} - \frac{5}{4}\right)$

Answer:                                 

**12. Challenge.** Evaluate:  $\left(-\frac{3}{4} + \frac{1}{2}\right) \div \left(-\frac{5}{8}\right)$

Answer:
