

Skills Summary

Counting Forward from Any Number

Use this reference while completing your worksheet or when studying.

Skill 1 — Counting On by Ones

Rule: You do not have to start at 1. Say your starting number, then count on: each next number is **one more** than the number before it.

Example: Start at 24. Write the next two numbers.

Step 1. We are counting forward, so each new number is one more than the last one — start saying the count at 24.

Step 2. One more than 24 is **25**; one more than 25 is **26**. So the count goes 24, 25, 26.

Try it: Start at 42. Write the next two numbers.

check: 43, 44

Skill 2 — Crossing into a New Tens Group

Rule: When a number ends in **9**, the next number starts a new tens group: after 29 comes 30, after 59 comes 60, after 99 comes 100.

Example: Start at 29. Write the next two numbers.

Step 1. 29 ends in 9, so the next number begins a new tens group — the thirties.

Step 2. One more than 29 is **30**, and one more than 30 is **31**.

Try it: Start at 49. Write the next two numbers.

check: 50, 51

(!) Watch out: After 39 many counters say “thirty-ten.” There is no thirty-ten — the next number is **40**, the start of the forties.

Skill 3 — Reading a Hundred-Chart Row

Rule: In a hundred-chart row you read left to right, and every box is **one more** than the box on its left.

Example: A chart row shows 61, 62, 63, __, 65. What goes in the empty box?

Step 1. The empty box sits just right of 63, and moving one box right adds one — so count on from 63.

Step 2. One more than 63 is **64**, and that fits: 64 comes right before 65.

Try it: A chart row shows 31, 32, __, 34. What goes in the empty box?

check: 33
