

Numerals, Number Words, and Quantities

Directions: Numbers can be shown three ways — as **dots** you can count, as a **numeral** like 4, and as a **number word** like *four*.

- Count every dot picture one dot at a time.
- Write numerals carefully so a friend could read them.

1. Count the dots. Write the numeral that matches. _____

2. The word card says *seven*. Write the numeral that matches the word. _____

3. The ten-frame shows a quantity. Count the dots and write the numeral. _____

4. The word card says *nine*. Write the numeral that matches the word. _____

5. The numeral card shows

8

. Draw that many dots in the space below. You can draw them in rows to keep count.

6. Count the dots in the two groups together. Write the **numeral** and the **number word**.

Numeral: _____ Number word: _____

7. The ten-frame shows dots and the numeral card shows

9

. Write the numeral for the dots, then write $<$, $>$ or $=$ to compare your numeral with the card.

Numeral for the dots: _____ My numeral _____ 9

8. Challenge. Three cards show numbers in three ways: card A says the word *six*, card B shows dots, and card C shows the numeral 5.

Card B: ● ● ● ● ● ● ●

Numeral for card A: _____ Numeral for card B: _____

Now write the three numerals in order from least to greatest: _____
