

See It Fast! Quantities to Five

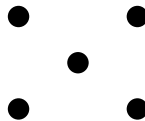

Directions: Some dot pictures you can know *just by looking* — no counting one by one!

- Look at the whole pattern first. Try to see the number all at once.
- If a pattern is tricky, look for small parts you already know.

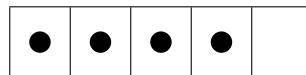

1. Look quickly! How many dots? _____

2. Look quickly! This is the pattern from a game die. How many dots? _____

3. A five-frame helps you see numbers fast.

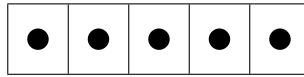

How many dots? _____ How many empty boxes? _____

4. This pattern is made of two small parts. Write the parts and the total.

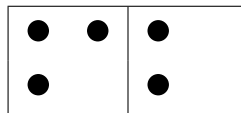

_____ and _____ make _____

5. Look at this five-frame.

How many dots? _____ How many empty boxes? _____

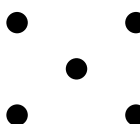

6. A domino has dots on two halves. Write the parts and the total.

_____ and _____ make _____

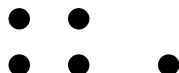

7. Two cards! Look quickly at each pattern and write its number. Then write $<$, $>$ or $=$ between the numbers.

Card A: 

Card B: 

Card A: _____ Card B: _____ Card A _____ Card B

8. Challenge. Look quickly! Write the two parts you see and the total.

_____ and _____ make _____

Then tell how you saw it without counting every dot — tell a grown-up or write it below.
