

Skills Summary

Number Bonds to 10

Use this reference while completing your worksheet or when studying.

Skill 1 — Find the Missing Part of a Bond

Rule: In a number bond, the two **parts** always add up to the **whole**: $\text{part} + \text{part} = \text{whole}$.
If one part is hiding, count on from the part you know up to the whole.

Example: The whole is 8. One part is 6. Find the missing part.

Step 1. We know the whole and one part, so we count on from the part we know up to the whole.

Step 2. Start at 6 and count on to 8: 7, 8 — that is 2 counts, and $6 + 2 = 8$. ✓
⇒ the missing part is **2**

Try it: The whole is 9. One part is 6. What is the missing part?

check: 3

Skill 2 — Finish a Bond's Fact Family

Rule: One bond makes **four facts** with the same three numbers:
 $\text{part} + \text{part} = \text{whole}$ (both orders), and $\text{whole} - \text{part} = \text{other part}$ (both parts).

Example: Bond: whole 7, parts 2 and 5. Three facts are done: $2 + 5 = 7$, $5 + 2 = 7$, $7 - 5 = 2$. Write the missing fact.

Step 1. Every fact uses the same three numbers, so we look for the subtraction that has not been used: taking the part 2 from the whole.

Step 2. $7 - 2$ leaves the other part: $7 - 2 = 5$. ✓
⇒ the missing fact is $7 - 2 = 5$

Try it: Bond: whole 8, parts 3 and 5. Write the answer to the family fact $8 - 5$.

check: 3

Skill 3 — Check a Bond and Fix It

Rule: To check a bond, add the two parts. If they do not make the whole, one number is wrong — fix it so $\text{part} + \text{part} = \text{whole}$ again.

Example: Mia's bond says the whole is 9 with parts 4 and 6. Fix the second part.

Step 1. We check a bond by adding its parts, and $4 + 6$ makes more than the whole 9, so the 6 must change.

Step 2. Count on from 4 up to 9: 5, 6, 7, 8, 9 — that is 5 counts, and $4 + 5 = 9$. ✓
⇒ the fixed part is **5**

Try it: A bond says the whole is 7 with parts 3 and 5. The 5 is wrong — what should it be?

check: 4

(!) Watch out: In a fact family, do not write the same fact two times! Swapping the parts makes a *new* addition fact, but a copied subtraction fact is still just one fact.
