

# Take Away and Write It

## Answer Key

Kindergarten–Grade 1

### Quick Answers

---

- |                             |                                |
|-----------------------------|--------------------------------|
| 1. 4                        | 5. dots not crossed out = 5, — |
| 2. how many are left = 4, — | 6. 4                           |
| 3. 5                        | 7. 6                           |
| 4. 3                        | 8. how many popped = 3, —      |
- 

### What is verified

---

5 of 8 problems fully machine-checked against SymPy.

— marks an answer only you can judge — problems 2, 5, 8. The worked solution states what a correct response must contain.

The author marked 6 blanks as working space (*not* answers — nothing checks what lands there).

---

### Curriculum

---

**Level:** Kindergarten–Grade 1

1.OA.C.6 – *problem 6*

K.OA.A – *problems 1, 2, 3, 4, 5, 7, 8*

*Difficulty 1–4 of 5 across 11 tagged checks.*

---

- 1.** The picture shows 6 apples. 2 are crossed out. How many apples are left?

**Solution:** Count all the apples: 6. The 2 crossed-out apples are taken away, so count only the plain ones: 1, 2, 3, 4. So  $6 - 2 = 4$ . 4

- 2.** Your turn to make the picture! Draw 7 circles. Cross out 3 of them. How many circles are left?

**Solution:** The drawing shows 7 circles with 3 crossed out. Counting the circles without a cross: 1, 2, 3, 4. So  $7 - 3 = 4$ . 4

*Drawing (instructor judges):* 7 circles drawn, exactly 3 crossed out, 4 left plain — the picture and the equation tell the same story.

- 3.** There are 8 counters. 3 are crossed out. Write the story numbers in the equation, then write how many are left.

**Solution:** The start number is 8 and the taken-away number is 3, so the equation reads  $8 - 3 = ?$  Count the plain counters: 5. So  $8 - 3 = 5$ . 5

- 4.** 5 birds sit on a fence. 2 birds fly away. Write the story numbers in the equation, then write how many birds are still on the fence.

**Solution:** Flying away is taking away: start with 5, take away 2. The equation is  $5 - 2 = ?$  Count back from 5: 4, 3. So  $5 - 2 = 3$ . 3

**5.** The ten-frame shows 9 dots. Cross out 4 dots. How many dots are *not* crossed out?

**Solution:** Cross out any 4 dots — say the bottom row's four. The unmarked dots are the full top row of 5. So  $9 - 4 = 5$ . 5

*Crossing out (instructor judges):* exactly 4 dots crossed out, 5 left unmarked.

**6.** Think: 6 and how many more make 10? Find  $10 - 6$ .

**Solution:** Use the partner pair:  $6 + 4 = 10$ , so taking 6 from 10 leaves the partner 4.  $10 - 6 = 4$ . 4

**7.** Rosa has 9 grapes. She eats 3 of them. Write the story numbers in the equation, then write how many grapes are left.

**Solution:** Start with 9, take away 3: the equation is  $9 - 3 = ?$  Count back from 9: 8, 7, 6. So  $9 - 3 = 6$ . 6

**8.** Challenge! The picture shows 10 balloons. Some popped, and now 7 balloons are left. Cross out balloons to show the ones that popped. How many balloons popped?

**Solution:** We know the start (10) and what is left (7), and we need the taken-away number. Cross out balloons one at a time until 7 remain: that takes 3 crosses. Check:  $10 - 3 = 7$ . So the missing number is 3

*Crossing out (instructor judges):* exactly 3 balloons crossed out, 7 left plain, matching the story.
