

Number Path Subtraction

Counting back on the path, counting up on the path, and finding the missing hop

Directions:

- Every problem has its own number path. Put your finger on the start number.
- To subtract, hop **back** — or start at the smaller number and hop **up**. Count your hops!
- You may draw your hops on the path any time it helps.

1. Here is the pattern. Start at 7. Hop back 2: you land on 6, then 5. So $7 - 2 = 5$. Now trace it yourself and write the answer.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$7 - 2 = \underline{\hspace{2cm}}$$

2. Start at 4. Hop back 1.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$4 - 1 = \underline{\hspace{2cm}}$$

3. Draw your hops on the path: start at 8 and hop back 3.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$8 - 3 = \underline{\hspace{2cm}}$$

4. Use the path to help you.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$9 - 2 = \underline{\hspace{2cm}}$$

5. A new way! To find $6 - 4$, start at 4 on the path and count the hops *up* to 6.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$6 - 4 = \underline{\hspace{2cm}}$$

6. Start at 7. Count the hops up to 10.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$10 - 7 = \underline{\hspace{2cm}}$$

7. Pick your way: hop back, or count up.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$10 - 4 = \underline{\hspace{2cm}}$$

- 8.** The hop number is hiding! Start at 8. You land on 3. How many hops back did you make?

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$8 - \underline{\hspace{2cm}} = 3$$

- 9.** Pick your way: hop back 6 times, or count up from 6. Draw your hops on the path.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$9 - 6 = \underline{\hspace{2cm}}$$

- 10.** Challenge! Mo starts at 10 and hops back. He lands on 6. How many hops did he make? Tell how the path shows it.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

$$10 - \underline{\hspace{2cm}} = 6$$
