

Two-Step Measurement Stories

Two-step stories about time, money, mass, and liquid volume

Directions:

- Every story here takes *two* steps. Find the hidden first step, then answer the question.
- Watch the units: minutes, cents, dollars, grams (g), kilograms (kg), and liters (L).
- Show both steps in the work space, and write the unit with every answer.

1. Sam's recipe should take 40 minutes in all. He stirred the batter for 5 minutes and baked it for 30 minutes. How many minutes are left for cooling?

Answer: _____ minutes

2. Rosa buys a pencil for 35 cents and an eraser for 25 cents. She pays with a one-dollar bill, which is worth 100 cents. How many cents does she get back?

3. Mrs. Diaz buys 12 kg of apples and 8 kg of pears. Her cart can hold 30 kg in all. How many more kilograms of food can she add to the cart?

Answer: _____ kg

4. A soup pot holds 6 L. The chef pours in 2 L of broth and 3 L of water. How many more liters can the pot hold?

Answer: _____ L

5. Gym class is 45 minutes long. The class plays 3 rounds of a game, and each round takes 10 minutes. How many minutes of class are *not* spent on the game?

Answer: _____ minutes

6. Sticker packs cost 4 dollars each. Jon buys 3 packs and pays with a 20-dollar bill. How many dollars does he get back?

7. One can of beans has a mass of 400 g. Talia buys 2 cans of beans and one 350 g jar of sauce. What is the total mass of her groceries, in grams?

Answer: _____ g

8. An empty aquarium holds 24 L when full. It is filled using 4 equal buckets. After 3 of those buckets have been poured in, how many liters of water are still needed to fill the aquarium?

Answer: _____ L

9. The ride on Train A takes 48 minutes. The trip on Train B takes 29 minutes, plus a 12-minute wait to change trains. How many minutes longer is Train A's ride than Train B's whole trip?

Answer: _____ minutes

10. Kane saves 5 dollars each week for 4 weeks. The game he wants costs 32 dollars. How many more dollars does he still need?

11. One brick has a mass of 3 kg, and one wooden board has a mass of 7 kg. Mr. Lee's wagon carries 4 bricks and one board. What is the total mass of the load, in kilograms?

Answer: _____ kg

12. Challenge. Papa makes 18 L of lemonade for the school fair. He fills 5 jugs that hold 2 L each, and then 4 bottles that hold 1 L each. How many liters of lemonade are left over?

Answer: _____ L
