

Reading Scaled Picture and Bar Graphs

Directions:

- **Graph A** (picture graph) goes with problems 1–3. **Graph B** (bar graph) goes with problems 4–8.
- Read the *scale* first: in Graph A one symbol stands for *more than one* book, and in Graph B the number line counts by 2s.
- Show how you used the scale in the work space.

Graph A — Books Read This Month (each  stands for 5 books)

Ana   

Ben    

Cara  

Graph B — Pets in Grade 3

1. In Graph A, each book symbol stands for 5 books. Ana's row shows 3 symbols. How many books did Ana read?

Answer: _____

2. In Graph A, Ben's row shows 4 symbols and Cara's row shows 2 symbols. How many books did Ben and Cara read *together*?

Answer: _____

3. Dev read 25 books this month.

(a) How many book symbols would show Dev's 25 books in Graph A? _____

(b) Draw Dev's row of book symbols in the box below.

4. Use Graph B. The number line counts by twos. How many dogs are there?

Answer: _____

5. Use Graph B. How many pets does the whole graph show in all?

Answer: _____

6. Use Graph B. How many *more* dogs are there than birds?

Answer: _____

7. Use Graph B. Which pet group is the *smallest*?

Answer: _____

8. Use Graph B.

(a) Write the four pet counts in order from least to greatest:

least _____ greatest

(b) Which display — a picture graph or a bar graph — makes it easier to compare the pet groups? Say why.
