

Adding and Subtracting Fractions

Adding, subtracting, and decomposing fractions with like denominators

Directions:

- The bar pictures show fractions of one whole. Use them to help you see what is happening, then write the matching number sentence.
- Give every fraction answer in simplest form.

- 1.** The bar below is cut into sixths. The dark part shows $\frac{2}{6}$ and the light part shows $\frac{3}{6}$. Use the bar to add: $\frac{2}{6} + \frac{3}{6}$

Answer: _____

- 2.** Every fraction is a sum of unit fractions (fractions with a 1 on top). Fill in the two missing unit fractions: $\frac{3}{4} = \frac{1}{4} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

- 3.** Subtract: $\frac{5}{8} - \frac{2}{8}$

Answer: _____

4. Ella walks $\frac{3}{10}$ mi from home to the park, and then $\frac{4}{10}$ mi more from the park to school. How far does she walk in all, in miles?

Answer: _____ mi

5. The bar below is cut into eighths, and $\frac{7}{8}$ is shaded. Cross out $\frac{3}{8}$ of the whole bar, then subtract: $\frac{7}{8} - \frac{3}{8}$

Answer: _____

6. Find the missing fraction: $\square + \frac{4}{10} = \frac{7}{10}$

Answer: _____

7. Fill in the missing numerator: $\frac{5}{6} = \frac{3}{6} + \frac{\square}{6}$

Answer: _____

8. Ravi mixes paint: $\frac{3}{8}$ L of red, $\frac{3}{8}$ L of blue, and $\frac{1}{8}$ L of white. How many liters of paint does he make in all?

Answer: _____ L

9. A garden has 12 equal sections. In all, $\frac{9}{12}$ of the garden is planted, and beans fill $\frac{5}{12}$ of the garden. What fraction of the garden is planted with something other than beans? On the lines below your work, explain why the denominator stays 12 when you subtract.

Answer: _____

10. Challenge. Maya's water bottle starts full. She drinks $\frac{1}{8}$ of it in the morning and $\frac{5}{8}$ of it at lunch.

(a) What fraction of the bottle has she drunk? _____

(b) What fraction of the bottle is left? _____
