

Seeing How Many Without Counting

Directions — read these with your grown-up or teacher:

- Look at the picture for a moment, then *say* how many. Try not to point and count each dot one at a time.
- Write the number in the answer blank.
- If you are not sure, you may check by counting — but say the number first.

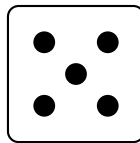

How the pictures are drawn. A *dot card* shows loose dots. A *five-frame* is a strip of five boxes: when every box is filled it shows five, so an empty box tells you how far you are from five. No numbers are printed on the pictures — the picture is the number.

1. Look at the dot card. How many dots?

Answer: _____

2. Say this one fast. How many dots?

Answer: _____

3. A full five-frame holds five. This one has one empty box. How many dots are in the frame?

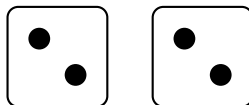

Answer: _____

4. Use the empty boxes to help you. How many dots are in this five-frame?

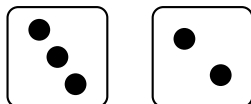

Answer: _____

5. Two little groups. Say each group without counting, then say how many in all.

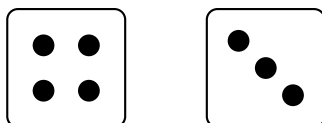

Answer: _____

6. Say each group, then say the total.

Answer: _____

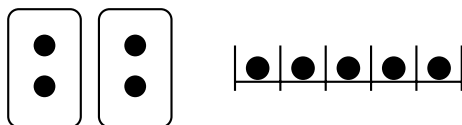

7. Which card shows **more**? Say each card without counting, then write $>$ or $<$ in the blank.

left card _____ right card

Answer: _____

8. This one is tricky. The left card has two little groups. The right card is a full five-frame. Write $>$ or $<$ in the blank.

left card _____ right card

Answer: _____
