

Adding, Subtracting, and Missing Numbers to 20

Adding, subtracting, and finding the missing number, all mixed together so you decide what each one is asking

What to do. These problems are mixed up on purpose. Look at each one before you start and ask yourself: *am I putting groups together, taking some away, or hunting for a number that is missing?*

- A plus sign means put the groups together.
- A minus sign means take some away.
- A blank line means a number is missing. It might be at the start, in the middle, or at the end. Fill the blank so both sides of the = sign are the same.

You may use the number line. Hop forward to add and hop backward to subtract. Counters, fingers, or drawings are all fine too — show how you worked it out in the space under each problem.

1. $8 + 5 = \underline{\hspace{2cm}}$

2. $12 - 5 = \underline{\hspace{2cm}}$

3. $7 + \underline{\hspace{2cm}} = 15$

4. $9 + 7 = \underline{\hspace{2cm}}$

5. $16 - 7 = \underline{\hspace{2cm}}$

6. $\underline{\hspace{2cm}} - 4 = 9$

7. Maya has 6 stickers. Her friend gives her 8 more stickers.
How many stickers does Maya have now?

Answer: _____

8. There are 15 apples in a bowl. The family eats 7 of them.
How many apples are left in the bowl?

Answer: _____

9. Sam has 5 marbles. He needs 12 marbles to play the game.
How many more marbles does Sam need?

Answer: _____

10. Put it all together. Here is one addition fact: $9 + 4 = 13$

Use those same three numbers to write three more facts. Two of them use a minus sign.

$$4 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \qquad 13 - 9 = \underline{\hspace{2cm}} \qquad 13 - 4 = \underline{\hspace{2cm}}$$
