

Counting Forward Within 100

Answer Key

Kindergarten–Grade 1

Quick Answers

- | | | | |
|-------|-------|-------|-------|
| 1. 37 | 3. 25 | 5. 53 | 7. 81 |
| 2. 60 | 4. 71 | 6. 60 | 8. — |
-

1. Count on from 34: 35, 36, **37**. The box sits between 36 and 38, so the missing number is 37.
2. Count on from 56 four times: 57, 58, 59, 60. Ending number: 60.
3. Two full ten-frames are $10 + 10 = 20$ dots. Counting forward 5 more gives 21, 22, 23, 24, 25. Total dots: 25.
4. Count on from 68 three times: 69, 70, 71. Stopping number: 71.
5. Count on from 47 six times: 48, 49, 50, 51, 52, 53. Last number said: 53.
6. Counting by tens adds ten each step: 30, 40, 50, 60. The next number is 60. Only the tens digit changes; the ones digit stays 0.
7. Just before means one less. Counting up we say 81, 82, 83, so the number before 82 is 81.
8. Ana lands on $45 + 4 = 49$. Ben lands on $47 + 3 = 50$. Since 49 is less than 50, Ana's number is smaller, so the correct symbol is $<$.
