

Skills Summary

Counting Forward Within 100

Use this reference while completing your worksheet or when studying.

Skill 1 — Counting forward by ones (count-forward-by-ones)

Rule:

To count forward, start at the given number and say the next numbers in order. Each step adds **one**. Do not start over at 1.

Example: Start at 41 and count forward 3.

Step 1. Put 41 in your head. It is the starting number, not the first count.

Step 2. Count on three times: 42, 43, 44. The last number said is **44**.

Try it: Start at 57 and count forward 4.

check: 19

Skill 2 — Counting forward by tens (count-forward-by-tens)

Rule:

Counting by tens adds **ten** each step. The ones digit stays the same and the tens digit goes up by one: 20, 30, 40, ...

Example: Start at 20 and count forward 2 tens.

Step 1. One ten past 20 is 30.

Step 2. One more ten past 30 is 40, so the answer is **40**.

Try it: Start at 25 and count forward 3 tens.

check: 55

Skill 3 — Comparing what you counted (compare-counting-results)

Rule:

Finish **both** counts first, then compare the two ending numbers. $<$ means *is less than*; $>$ means *is greater than*.

Example: Compare $30 + 5$ and $32 + 2$.

Step 1. Count each one: 30 forward 5 lands on 35; 32 forward 2 lands on 34.

Step 2. 35 is greater than 34, so the symbol is $>$.

Try it: Compare $60 + 3$ and $61 + 3$.

check: $>$

(!) Watch out: Do not count the starting number as your first count. Starting at 41 and counting 3 gives 44, not 43.
