

Adding Three-Digit Numbers with Regrouping

adding three-digit numbers with one regroup and with two, estimating a sum by rounding to the nearest hundred, and finding a regrouping mistake

Directions

- Add one column at a time, starting with the ones.
 - When a column adds to ten or more, write the ones digit and carry the ten into the next column.
 - Write the small carry digit above the column it goes into, so nothing gets lost.
-

1. Add. Write the carry digit above the column it belongs to.

$$\begin{array}{r} 347 \\ + 128 \\ \hline \end{array}$$

Sum: _____

2. Add. Write the carry digit above the column it belongs to.

$$\begin{array}{r} 256 \\ + 137 \\ \hline \end{array}$$

Sum: _____

- 3.** Add. This one regroupes twice.

$$\begin{array}{r} 486 \\ + 275 \\ \hline \end{array}$$

Sum: _____

- 4.** First estimate, then add exactly.

(a) Round each number to the nearest hundred, then add the rounded numbers.

$$412 + 389 \approx \underline{\hspace{2cm}}$$

(b) Now find the exact sum. $412 + 389 = \underline{\hspace{2cm}}$

- 5.** Add. This one regroupes twice.

$$\begin{array}{r} 594 \\ + 268 \\ \hline \end{array}$$

Sum: _____

- 6.** A class read 354 pages in March and 427 pages in April. How many pages did the class read in all?

$$\begin{array}{r} 354 \\ + 427 \\ \hline \end{array}$$

Answer: _____ pages

7. First estimate, then add exactly.

(a) Round each number to the nearest hundred, then add the rounded numbers.

$$638 + 275 \approx \underline{\hspace{2cm}}$$

(b) Now find the exact sum. $638 + 275 = \underline{\hspace{2cm}}$

8. Dev added 476 and 258 and wrote 624.

(a) Add the two numbers correctly. $\underline{\hspace{2cm}}$

(b) Explain what Dev did wrong.

- 9.** A library has 268 books on the first shelf, 145 books on the second shelf, and 87 books on the third shelf. How many books are on the three shelves altogether?

$$\begin{array}{r} 268 \\ 145 \\ + 87 \\ \hline \end{array}$$

Answer: _____ books

- 10.** Estimate first, then check your estimate against the exact answer.

(a) Round each number to the nearest hundred, then add. $487 + 356 \approx$ _____

(b) Find the exact sum. $487 + 356 =$ _____

(c) Explain how close your estimate came, and why it landed on that side of the exact sum.
