

Missing and Mixed-Up Numbers

How to use this page:

- Say the numbers out loud as you read each row.
 - When a number is missing, say the number just before the blank, then say the next one. That is the number that goes in the blank.
 - Two rows have a mistake in them. Find the mistake, then write the row the right way.
-

1. Write the number that is missing.

5 6 _____ 8 9

Answer: _____

2. Write the two numbers that are missing.

11 12 _____ 14 _____ 16

Answer: _____

- 3.** Circle the number that is greater. Then write it on the line.

21

12

Answer: _____

- 4. Find the mistake.** Ben counted his blocks out loud. He said:

6

7

9

10

11

Ben left a number out. Write the number Ben missed on the line. Then write his whole count the right way.

Answer: _____

5. Find the mistake. Mia put her number cards in a row:

13 14 16 15 17

Two cards traded places. Write all five numbers in counting order.

Answer: _____

6. Show how you know. Which number is missing?

17 18 _____ 20

Draw a number line, or draw that many counters, to show how you found it.
Then tell a grown-up how you checked your answer.
