

Place Value with Base-Ten Models

Directions:

- In these models, a big square (flat) shows one hundred, a tall bar (rod) shows one ten, and a small square (cube) shows one.
- Count the blocks carefully, then write your answer on the blank.

1. Write the number the model shows.

Answer: _____

2. A model shows **2 hundreds, 4 tens, and 6 ones**. Write the number the model shows.

Answer: _____

3. Write the number the model shows. Look carefully at which blocks are missing!

Answer: _____

4. Fill in the blanks for the number **573**.

573 has _____ hundreds, _____ tens, and _____ ones.

5. What is the *value* of the tens digit in **482**?

Answer: _____

6. Model A and Model B are shown below. Count what each model shows, then write $<$, $>$, or $=$ in the blank.

Model A

Model B

Model A _____ Model B

7. Fill in the blanks for the number **407**.

407 = _____ hundreds + _____ tens + _____ ones

8. Challenge. A model shows **12 tens and 5 ones** — more than ten tens! What number does the model show? Then, on the lines in your work space, explain how you regrouped ten tens to make one hundred.

Answer: _____
